

Makeup Instruction Sheet

Do not use Frosted Eyeshadows!

1. Foundation -- Should be applied and blended completely into neck to avoid a line on jaw.
2. Apply loosed powder over entire face and neck to set foundation.
3. Line top lid and 1/2 of bottom lid (outside of eye to center) with brown liner pencil. Blend and apply brown eye shadow directly over liner to set.
4. Brush a neutral eye shadow (creme or beige) over entire eye area, lid to eyebrow.
5. Apply a dark brown shadow to crease of eye. Blend to soften line.
6. Use a pink tone highlighter shadow under eyebrow and blend into contour line in crease of eye.
7. Using a eyelash curler, curl upper lashes. Apply black mascara to both upper and lower lashes.
8. A pink-toned blush powder should be applied to cheek bones beginning at the "apple" of cheeks and blending into hairline.
9. Line lips with a lip liner slightly darker than lip color.
10. Lipstick should be a pink-red tone. Be sure to blot after application. Again -- no frosted or glossy lipstick.
